TVA Parcel 240 is just South of Apollo Shores and provides an approximate six acre thickly wooded natural respite to the neighboring resort. This Parcel 240 is currently Zone 4, Natural Resource Conservation, which means no development. At our Annual Meeting on 8/20/22, we held a vote that strongly affirmed our position to keep this zoning the same, and a petition was also circulated. Much work was put into this effort by residents Chris Hill and Gail Oculczyk. We also wrote to the TVA Chairman explaining our opposition to changing the parcel from Zone 4 to 6. TVA has responded to our letter and said that a public hearing would have to be held before the classification of the parcel could be changed.

With summer fast approaching, let's all think about our homes and lawns. When you decided to purchase a home in Apollo Shores, you made a great decision based on the reputation, character and appeal of the neighborhood. The appearance of our homes and lawns sets the standard for the neighborhood. Let's all ensure our homes are neat and attractive.

The Board has performed needed maintenance at Caron Drive Park. We have maintained the old rip-rap shoreline to stabilize it and made some repairs to the pavilion. We plan more sprucing up and landscaping this spring.

Did you know that more children die from drowning than any other cause, and it's the second leading cause of death for children age 5-14? **The Younger the Child, the Greater the Risk.** Most parents think water safety is first and foremost on their minds whenever they are enjoying summer activities with their young kids. But when the unthinkable happens, caregivers often say, "I only looked away for a second." Never leave your child alone near the water.
